*14' x 48' "lean-tos" (optional)*

*Footprint: 48' x 56' (including lean-tos)*

*Designed by:  
Zirnhelt Timber Frames*

**If you're thinking of building a barn, shop or other outbuilding, you might find that a timber frame is the ideal option. We advocate putting all buildings on a proper foundation (rather than a pole barn for example). This is a key to ensuring structural integrity: With a solid timber frame and sufficient roof overhangs, your building can become a heritage building with it's value being passed on for generations to come. To view one of our timber structures and discuss options for your own plans, please give us call at 250-392-0103 and visit us online at [www.ZTFrames.com](http://www.ZTFrames.com)**

**We look forward to working with you!**
